EMERGENCY ONLY - 727-224-2997

Fumigation Preparation Instructions

1. Remove all persons, domestic animals, pets- including fish and desirable growing plants prior to fumigation.
2. Remove mattresses (except waterbeds) and pillows completely enveloped in waterproof covers or remove the covers.
3. Remove food, feed, drugs, medicines, and tobacco products (including those items in refrigerators, and freezers) NOT in plastic, glass, metal bottles, cans, or jars with the manufacturers original air-tight seal intact. Due to Vikane label requirements any item(s) for human consumption left in the structure and not stored properly will be disposed of prior to the introduction of the fumigant at your expense.
4. Remove all outside lights prior to the fumigation.
5. Remove all exterior landscaping lighting, planters, statues, birdbaths, etc. away from the structure.
6. Extinguish all flames, including pilot lights. Unplug all electrical heating elements such as those in heaters, pianos, organs, etc. Shut off automatic switch controls for appliance and lighting systems. **DO NOT SHUT OFF THE ELECTRICITY** as it will be required to power the fans used to keep the fumigant circulating during the fumigation process.
7. To insure proper fumigant circulation and aeration of your structure all drapes, cabinets, drawers, closets, and internal doors **MUST BE OPENED**. Blinds should be raised.
8. Florida Statutes requires that all structures be locked during the fumigation and opened during the aeration process, therefore we **MUST** be provided with **KEY(s)** to all doors.
9. Shrubbery and trees adjacent to the structure should be trimmed back heavily and away from structure **24 inches AND** watered in order to minimize foliage loss.
10. Driveways/Parking Lots must be clear of all vehicles.
11. Fences attached to the structure must be detached by the owner/agent, if Geiger's Pest Services, Inc. has to remove the fence then we will not be responsible for damage or reattachment. Any attached decking may be removed to ensure a **GROUND SEAL**, if removed Geiger's Pest Services, Inc. will **NOT** be responsible for damage or reattachment.
12. All obstructive articles such as antennas, guide wires, weather vanes, or satellite dishes should be removed prior to the fumigation. Geiger's Pest Services, Inc. **WILL NOT** be responsible for video reception.
13. During the fumigation and aeration process, Geiger's Pest Services, Inc. **WILL NOT** be held responsible for vandalism, theft, or unauthorized entry. If you are concerned, we recommend that you obtain a guard at your own expense.
14. The fumigated structure **MUST NOT BE ENTERED** until it has been declared safe for entry by post notice.
15. Geiger's Pest Services, Inc. must be notified of any damage due to gross negligence within 24 hours.
16. Mulch, rocks, and leaves must be raked back 2 ft. away from structure.
17. Screens bordering structure (screen pools or porches) must be pulled or cut at least 3 ft. away from structure.
18. Turn off air conditioning and heating. Split key & secondary locks are used for security. **DO NOT REMOVE.**

LIABILITY RELEASE: Tent fumigation is heavy work we take the position that we cannot be responsible for roof damage (cracked or broken tiles), screening, tiles, antennas, ducts, gutters, awnings, ventilators, solar panels, paint chipping, gutters, chimney caps, etc. unless such damage is caused by our gross negligence. The preceding has noted most but not necessarily all potential liability factors, as many homes are unique as to that aspect. Please, understand the above factors also apply to mobile homes and that our trained crews will endeavor to render quality fumigation with minimum inconvenience to you and your family. Your contract charge, assumes the above will be provided to or by the client. Should the company incur additional production man-hours or other expenses as a result of the client not providing any of the above, the client agrees to amend the contract charge to include these expenses.

Current production man-hours charge \$75.00 Client's initial _____.

Please initial the box above that you understand the general liability release statement as well as specifically obvious type liability factors.

TIME OF FUMIGATION: IT IS IMPOSSIBLE FOR US TO PREDICT THE ARRIVAL TIME PRIOR TO ACTUAL DAY OF FUMIGATION. ALL WORK IS SCHEDULED GEOGRAPHICALLY TO SAVE TIME AND ON THOSE OCCASIONS WHEN A TIME IS FORECAST TO A CUSTOMER, WE ASK YOUR INDULGENCE TO THE FACT JOBS TAKE LONGER THAN EXPECTED.

We assume no responsibility for delays or postponements due to acts of God or War, average temperatures below 50 degrees or winds exceeding 20 mph.

NOTE: It is possible that ants might invade your home after fumigation. It is also possible to find other live insects in your house after the fumigation. This occurs because the dosage of gas used in the fumigation might not be the same needed to kill insects other than termites. Some pests such as spiders, which are not insects, require a much higher dosage. Should you have any questions or concerns, please contact our office. Please obtain a copy of the **FACT SHEET FOR VIKANE** by DOWAGRO SCIENCES by visiting our website at www.gpsbugs.com.
